AHMED SAMIR ABD EL AAL
Lead Full Stack Engineer (.NET | Angular | Mobile Hybrid)

(+20) 1275 900 461 | ahmed.samir.abdelaal@gmail.com | LinkedIn | GitHub | Cairo, Egypt

PROFESSIONAL SUMMARY

Full Stack .NET Staff Engineer / Lead with 8+ years of experience architecting and delivering large-scale, multi-tenant, and high-stakes digital transformation projects, primarily for the GCC/MENA governmental and enterprise sectors. Expertise in end-to-end solution delivery across the entire stack: **.NET Core** (Backend/APIs), **Angular** (Frontend), and **Ionic/Capacitor** (Hybrid Mobile). Proven ability to engineer resilient, scalable platforms that feature complex architectural requirements such as **Offline-First synchronization (SQLite)**, **Microservices**, and reliable asynchronous processing with tools like **RabbitMQ** and **Hangfire**. A Product-Minded Engineer focused on maximizing user-facing impact and strategic business value.

TECHNICAL ARSENAL

- **Core Stack:**
  - **Backend Engineering:** C#, .NET Core (up to V10), ASP.NET Core API, Web APIs (REST/SOAP) & GraphQL (Hot Chocolate), EF Core.
  - **Frontend Ecosystem:** Angular (up to v22), TypeScript, HTML, JQuery, CSS, JSON, ECMAScript, Ajax, XML.
- **Mobile & Hybrid:** Ionic 6+, Capacitor, .NET MAUI Blazor Hybrid.
- **Architecture:** Microservices, RabbitMQ, Kafka, Hangfire, SignalR, GraphQL (Hot Chocolate).
- **Cloud & DevOps:** AWS Lambda (Serverless), S3, MS Azure, Docker, Kubernetes, .NET Aspire , TFS, GIT, Bitbucket.
- **Database:** SQL Server (TSQL), SQLite, PostgreSQL, AWS Aurora.

PROFESSIONAL EXPERIENCE

Full Stack Lead
| **ELM (Remote via NTG Egypt)**, Riyadh, KSA - Remote | May 2024 – Present |

- **Saudi General Authority of Civil Aviation (GACA) Portal:** Spearheaded the development of critical e-services managing KSA aviation traffic, airport governance, and aircraft licensing. Ensured high-security compliance for sensitive government data.
- **CST (Mutasil) Portal:** Led the full-stack implementation for the Saudi Communication, Space & Technology Commission. Delivered modules for managing technology licenses and communications governance approvals.
- Designed and implemented robust, highly available, and secure multi-tier architecture APIs using **.NET Core** and **EF Core** to efficiently manage sensitive user data and complex regulatory workflows.

Full Stack Lead Developer
| Sure Global Tech (SGT), Cairo, Egypt (Serving KSA Government Entities)
| Feb 2022 – May 2024

Nupco Tender Portal (Medical ERP):

- Led a team of **7 engineers** to build "INupco," a micro-frontend/microservice portal acting as the central ERP for Nupco.
- **Impact:** The system successfully manages an annual tender plan exceeding **20 billion SAR**.

NEOM Smart City Services:

- Architected and delivered **7 production services** serving 13,000+ employees and investors in the NEOM giga-project.
- **Integration:** Integrated complex external hardware/software systems, including **Face Recognition**, Access Control Gates, and CAD SOS systems.

Government Auction Platform (ZATCA):

- Developed a high-traffic internal electronic auction platform, ensuring real-time bidding synchronization and data consistency as part of the KSA ZATCA platform.

KSA Ministry of Commerce (RPA Automation):

- Developed a Robotic Process Automation (RPA) solution to automatically audit and rate over **32,000 E-commerce websites**, monitoring price compliance and policy adherence.

KSA Ministry of Tourism:

- Delivered 3 critical production modules for facility licensing, serving 3,000+ government employees and investors

Senior Full Stack Developer
| **FlairsTech**, Cairo, Egypt | Jul 2021 – Feb 2022 |

- **US Ed-Tech (ScholarChip):** Maintained and scaled portal systems integrated with US School Information Systems (SIS).
- **Impact:** Supported **200,000+ students** and **500+ schools** across the USA, ensuring 99.9% uptime for auditing and student tracking services

Senior Software Engineer
| **ITWorx**, Cairo, Egypt | Apr 2020 – Jul 2021 |

- **Bio-Tech Enterprise Lab:** Developed a confidential Bio-Experiments Laboratory Application for a multinational research company (10,000+ employees), streamlining the recording and execution of biological experiments.
- **Qatar Government Systems:** Engineered a confidential document flow management system for the Qatari Government.

EARLIER CAREER HISTORY

Developer Roles (2018-2020)

- **.NET Software Developer, Full Stack** at New PC-Planet (Apr 2019 – Apr 2020): Developed/maintained the GHS Hospitality and Restaurant Project.
- **Full Stack Web Developer** at Echo-Link (Jan 2018 – Apr 2019): Developed, debugged, and designed financial modules for the ITQ ERP system.

Early Career Note: Successfully transitioned into a full-time software development career in 2018, leveraging prior experience (2013-2018) as a Cost Control Specialist, which provided a strong foundation in business processes, financial reporting, and analytical problem-solving.

KEY ARCHITECTURAL PROJECTS

(Personal/Self-Owned Projects Showcasing Specialization)

Pro Stores Manager (Offline-First SaaS)

- Built an **Offline-First Store Management System** with **.NET MAUI Blazor Hybrid** for 99.9% uptime.
- Created a custom **SQLite sync engine** for conflict-free client-cloud data replication.
- Developed performant, secure **.NET Core APIs** for high-traffic retail.
- **Solved** complex data synchronization challenges for offline-first retail environments.

Appify (No-Code Mobile App & Auto DB To API Builder Platform)

- Developed a **No-Code Drag-and-Drop Mobile App Builder** (SaaS).
- **No-Cod**e **Drag-and-Drop Database Builder with auto RESTful APIs generator**, architected by Microservices, RabbitMQ, SQLite, and PostgreSQL.
- Utilized **Ionic/Capacitor** to expedite native mobile builds (iOS/Android) from web code.
- Designed a scalable, modular, multi-tenant architecture.

Eazy-Order (Cloud POS/RMS).

- Utilized RabbitMQ for reliable, asynchronous order processing, enhancing peak-hour stability.
- Built resilient, high-throughput **.NET Core/PostgreSQL REST APIs** for real-time transactions and inventory management.

EDUCATION & CERTIFICATIONS

Post-Graduate Studies Diploma in Statistics, Cost Control, and Planning
| Alexandria University, High Research Studies Institute | May 2014 |

Bachelor of Commerce (Commerce and Economics)
| Alexandria University | May 2012 |

Key Professional Certifications

- **Agile PM Professional Certificate | EdX, University of Maryland (2020)**
- **Data Analysis Professional | Udacity (2020)**
- **React Native & Android Nanodegrees | Udacity (Africa App Internship)**
- **ASP.NET MVC 5 Web Applications | Microsoft Achievement (280 Hours)**

Languages

- **Arabic:** Native
- **English:** Bilingual
- **German:** Professional Working - **B2**
